

GREG CAICEDO

Vice President, Network & Data Solutions, Kratos
Technology & Training Satellite Products and
Federal Solutions

Greg Caicedo currently leads Kratos' Network & Data Solutions Segment within the Kratos Technology and Training Division. His responsibilities include the development and delivery of products and services related to network management, RF monitoring, geolocation and data analytics. His segment has a broad commercial and government customer base focused on SATCOM Owner Operators, Bandwidth Resellers, Network Operators, and SATCOM end users. Greg has 30 years of experience supporting a range of space programs and missions. His career duties include program management, operations and leadership positions for National Space, Launch Vehicles, Space Situational Awareness and SATCOM programs. Greg began his career as an Air Force Officer spending 20 years supporting National and Air Force Space Command programs. Since his retirement he has continued working space programs in ISR, SSA and SATCOM previously at RadiantBlue Technologies and now with RT Logic and Kratos Defense since 2012.
