

JERRY MELESKI

Vice President,
Protected Tactical Communications

Jerry Meleski is Kratos RT Logic's Vice President of Protected Tactical Communications (PTC). In this role, he is responsible for strategy, business development, personnel, Research and Development (R&D), program management, and financial growth. The mission of PTC is to provide Communications Superiority for our Warfighters. The PTC product portfolio includes miniaturized multi-band ISR radios, protected waveforms, Common Data Link (CDL) waveforms, CDL test, missile test, and ISR ground systems.

Since joining Kratos RT Logic in 2001, Mr. Meleski has led and managed several business areas focused on product development for satellite ground systems and secure tactical ISR systems for DoD, Civil, Intelligence Community, and Commercial customers. Prior to Kratos RT Logic, Mr. Meleski served in satellite systems architecture roles for Harris; Software Technology, Inc.; and IBM on several satellite programs.

Mr. Meleski has 30 years' experience in the defense and aerospace industry. He holds a BS in Electrical Engineering from Geneva College.
