

JERRY MELESKI

Vice President, Tactical and Network Communications

Jerry Meleski is RT Logic's Vice President of the Tactical and Network Communications Division. In this role, he is responsible for business strategy, financial performance, research and development (R&D), successful execution and growth for a portfolio that includes real-time Digital IF transport, signal over IP transport, wideband signal capture/playback, and ISR related Common Data Link (CDL) products.

Since joining RT Logic in 2001, he has led and managed several successful business areas focused on developing and supplying satellite ground system products for numerous US satellite programs across DoD, Civil, Intelligence Community and Commercial customers. Prior to RT Logic, Mr. Meleski served in software and systems architecture roles for Harris, Software Technology, Inc and IBM on various satellite programs. Jerry has 28 years experience in the aerospace industry. He holds a BS in Electrical Engineering from Geneva College.
