

Quality Policy

RT Logic's purpose is to bring value to our customers, and to contribute to their success.

We accomplish this by anticipating, understanding, and adapting to customer needs. We use this customer perspective as we design, develop, integrate, test, deliver, and provide customer support for our products, projects, and systems.

We are committed to having, and continuously improving, a quality management system that supports our unique and demanding business model. Quality is seamlessly embedded throughout our processes, products, and systems.
