RT Logic ISO 9001:2000 Certification Announced
Registration Provides Independent Verification of RT Logic's Commitment to Quality

Colorado Springs, CO, March 20, 2006 -- RT Logic, a wholly-owned subsidiary of Integral Systems, Inc. (NASDAQ-ISYS) today announced it has received a Certification of Registration for ISO 9001:2000 for its Quality Management System from Platinum Registration. The scope of this registration includes the design, development, assembly, integration, test, delivery, and support of real time data processing systems.

To obtain the registration, RT Logic demonstrated adherence to a comprehensive set of standards, including quality systems, design control, customer satisfaction, management responsibility, inspection and testing, handling and delivery, training, and service. This registration certifies that RT Logic meets the standards demanded by the International Organization for Standardization (ISO).

"Our ISO registration covers all aspects of a system's lifecycle" said Rob Andzik, RT Logic's Business Area Manager for Core Products. "It is indicative of RT Logic's commitment to providing our customers with high quality products and engineering.

ISO 9001:2000 is the latest international standard for Quality Management Systems set forth by ISO. Companies seeking registration must demonstrate their ability to consistently provide products or services that meet customer and regulatory requirements to the satisfaction of an independent third party auditor.

About RT Logic

RT Logic is a leading provider of products for ground-based space applications, primarily for satellite and launch range operations. Known for exceptional innovation, performance and support, RT Logic has delivered over 1200 systems since its inception in 1997. RT Logic offers a complete line of Telemetrix™ products used in systems for widely varied control center, ground antenna, and range applications. Since October 2002, RT Logic has operated as a wholly owned subsidiary of Integral Systems Inc.

About Integral Systems

Founded in 1982, Integral Systems is a leading provider of satellite ground systems and has supported over 200 different satellite missions for communications, science, meteorological and earth resource applications. The Company was the first to offer an integrated suite of COTS (Commercial-Off-The-Shelf) software products for satellite command & control, the EPOCH IPS product line. EPOCH has become a world market leader in commercial applications with successful installations on 5 continents.

Through its wholly owned subsidiary SAT Corporation, the Company provides satellite and terrestrial communications signal monitoring systems to satellite operators and users throughout the world. The Company also provides software for equipment monitoring and control to satellite operators and telecommunications firms through its Newpoint Technologies, Inc. subsidiary. The Company's Lumistar Inc. subsidiary is a provider of system level and board level telemetry acquisition products. Integral Systems has approximately 410 employees working at Company headquarters in Lanham, Maryland, and at other locations in both the U.S. and Europe.
