## **Kratos to Complete Development and Fielding of RAIDRS System for Air Force Space Command and Missile Systems Center**

### **Award Adds \$9.9 Million to Satellite Command and Control Contract**

**SAN DIEGO, CA, January 17, 2012** (GlobeNewswire via COMTEX) – [Kratos Defense & Security Solutions, Inc.](#) (NASDAQ: KTOS), a leading National Security Solutions provider, announced today that its Integral Systems subsidiary executed a contract modification with the Air Force Space Command (AFSPC) and Missile Systems Center (SMC) to complete development and fielding of RAIDRS Block 10 (RB-10). The modification resulted in an additional contract value of \$9.9 million on the RAIDRS contract.

The Rapid Attack, Identification, Detection and Reporting System (RAIDRS) program supports the U.S. Air Force's Space Superiority Objective. RAIDRS Block 10 supports the Defensive Counter Space (DCS) initiative for Air Force Space Command (AFSPC) to detect, characterize, report and geolocate potential attacks against U.S.-protected communication satellites. When complete, RAIDRS will provide worldwide, real-time event detection and characterization of Electromagnetic Interference (EMI) from multiple transportable end nodes to a single control location. RAIDRS has already established its Central Operating Location (COL) at Peterson AFB and has broken ground on three of its five worldwide nodes.

"This action represents a significant milestone in the RAIDRS program by establishing the contractual foundation for Kratos to deliver the Final Operational Capability (FOC) to the Air Force to meet AFSPC's Defensive Counterspace Mission Requirements," said Bob Wright, Senior Vice President, Kratos Integral Federal Solutions group. "We are extremely proud that we will continue to serve the Air Force by protecting critical satellite communications links."

Kratos is the prime contractor for the RB-10 program. RB-10 uses Commercial Off-the-Shelf (COTS) hardware and software components from Kratos' Integral Systems companies, including signal processing products from RT Logic, Monics(R) Satellite Carrier Monitoring/Interference Detection software from SAT Corporation, and the Compass Enterprise Management System from Newpoint Technologies.

### **About Kratos Defense & Security Solutions**

Kratos Defense & Security Solutions, Inc. (NASDAQ: KTOS) is a specialized National Security technology business providing mission critical products, services and solutions for United States National Security priorities. Kratos' core capabilities are sophisticated engineering, manufacturing and system integration offerings for National Security platforms and programs. Kratos' areas of expertise include Command, Control, Communications, Computing, Combat Systems, Intelligence, Surveillance and Reconnaissance (C5ISR), satellite communication systems, unmanned systems, cyber warfare, cyber security, information assurance, critical infrastructure security and weapons systems sustainment. Kratos has primarily an engineering and technical oriented work force of approximately 4,000, many of which hold an active National Security clearance, including Secret, Top Secret and higher. The vast majority of Kratos' work is performed on a military base, in a secure facility or at a critical infrastructure location. Kratos' primary end customers are United States Federal Government agencies, including the Department of Defense, classified agencies, intelligence agencies and Homeland Security related agencies. News and information are available at [www.KratosDefense.com](http://www.KratosDefense.com).
