***RT Logic Awarded Skynet 5 Contract by EADS Astrium  
Company to Supply European Compliant Ground Systems for Skynet Ground Sites***

Colorado Springs, CO, July 2, 2003 -- RT Logic, a wholly owned subsidiary of Integral Systems, Inc. (NASDAQ:ISYS) today announced that EADS Astrium Limited in Stevenage, Hertfordshire England has awarded the company a contract to supply satellite baseband systems, S-Band modem systems, and other ground equipment for command and control of the NATO Skynet 4 and Skynet 5 satellite constellations. Skynet 4 provides secure communications for the UK's armed forces. Skynet 5 will provide secure communications services to UK and overseas customers. Under an initial authorization to proceed valued at \$300K in anticipation of a two-phase contract valued at over \$2 million, RT Logic is to replace legacy Skynet 4 ground equipment and supply next generation Skynet 5 systems at multiple ground sites in the United Kingdom.

"We are very pleased to be part of the EADS Astrium team for Skynet 5," said Jerry Meleski, RT Logic Director of Control Systems. "We look forward to enabling EADS Astrium's technical solution with our innovative technology for this highly visible international program. "

"EADS Astrium is very pleased to have a company of RT Logic's experience in this area supporting this vital element of the EADS Astrium Skynet 5 Programme," said Keith Rowe, Satellite Control and Operations Project Manager, Skynet 5 MCS, EADS Astrium.

"This strategic award shows that RT Logic is equipped for the global market," added Paul Thoreson, RT Logic Space Business Development Manager. "The Telemetry systems for Skynet utilize international open-systems standards such as CORBA, ESA CCSDS data processing, and Java. All delivered systems carry the CE Mark".

**About EADS Astrium**

EADS Astrium as Europe's No. 1 space company and an industry world leader, has an impressive track record across the spectrum of the space business: Earth observation, space science missions, telecommunications, ground systems, navigation and military programmes. EADS Astrium and its subsidiaries' sites in France, Germany, the UK and Spain had a turnover of around €1.2 Billion in 2002. EADS Astrium was the supplier of the UK and NATO's existing

Skynet 4 satellites and, under contract to Paradigm Secure Communications, EADS Astrium will upgrade the existing Skynet 4 satellite command and control infrastructure and will be responsible for the replacement of the existing Skynet 4 ground and space assets by a new, integrated Skynet 5 space and ground system.

### **About RT Logic**

RT Logic is a leading provider of products for ground-based space applications, primarily for satellite and launch range operations. Known for exceptional innovation, performance and support, RT Logic has delivered over 450 systems since its inception in 1997. RT Logic offers a complete line of Telemetrix™ products used in systems for widely varied control center, ground antenna, and range applications. Since October 2002, RT Logic has operated as a wholly owned subsidiary of Integral Systems Inc.

### **About Integral Systems**

Founded in 1982, Integral Systems is a leading provider of satellite systems and has supported over 190 different satellite missions for communications, science, meteorological and earth resource applications. The Company was the first to offer an integrated suite of COTS (Commercial-Off-The-Shelf) software products for satellite command & control, the EPOCH 2000 product line. EPOCH has become a world market leader in commercial applications with successful installations on 5 continents. The Company also offers products and services for satellite integration and test and payload data processing.

Through its wholly owned subsidiary SAT Corporation, the Company provides satellite and terrestrial communications signal monitoring systems to satellite operators and users throughout the world. The Company also provides software for equipment monitoring and control to satellite operators and telecommunications firms through its Newpoint Technologies, Inc. subsidiary. The Company's RT Logic subsidiary builds telemetry processing systems for military applications including tracking stations, control centers and range operations. Integral Systems has approximately 350 employees working at Company headquarters in Lanham, Maryland, and at other locations in the U.S. and Europe. Except for statements of historical facts, this news release contains forward-looking statements about the Company, including but not necessarily limited to financial projections, all of which are based on the Company's current expectations. There is no assurance that the Company's projections will in fact be achieved and these projections do not reflect any acquisitions or divestitures that may occur in the future. Such statements are subject to risks and uncertainties, including the Company's reliance on contracts and subcontracts funded by the U.S. government, intense competition in the ground systems industry, the competitive bidding process to which the Company's government and commercial contracts are subject, the Company's dependence on the satellite industry for most of its revenues, rapid technological changes in the satellite industry, the Company's acquisition strategy and those other risks noted in the Company's SEC filings. The Company assumes no obligation to update or revise any forward-looking statements appearing in this news release.
